LETSON ERP + OUTLET POS

Manual End-to-End Test Data Guide

Delivery -> Slicing -> Customer Sales -> Collections -> Outlet Transfer -> Mobile Cashier Sales

Purpose: Encode a small, traceable data set manually and reconcile inventory, revenue, customer balances, cash sales, and reports from beginning to end.

Test controls

Control	Required value
Test date	August 4, 2026
Supplier	JARRY VEE
Sliced product	C10 (50 PCS per pack)
Outlet	Use one test outlet consistently
Starting stock	OS1 = 0; PS4 = 0; C10 = 0; outlet C10 = 0
Test staff	Slicer: TEST SLICER; Packer: TEST PACKER

Execution order

- [ ] Encode all three supplier deliveries.
- [ ] Slice OS1 and PS4 into C10.
- [ ] Record two C10 customer sales.
- [ ] Record the two customer payments.
- [ ] Dispatch and confirm one C10 transfer to the outlet.
- [ ] Record two Buttered Chicken mobile cashier sales.
- [ ] Compare the final inventory, collection, and report results.

Important: Use unique receipt numbers exactly as shown. Do not mix unrelated transactions into the test date while reconciling the results.

1. Supplier Deliveries

Purchasing > Deliveries > Add Delivery

Code	Receipt	Product	Bags	Kilos	Heads	Price/kg	Amount
901	19001	OS1	2	34.00	24	P152.00	P5,168.00
902	19002	OS1	2	34.00	24	P152.00	P5,168.00
903	19003	PS4	2	31.50	30	P154.00	P4,851.00
TOTAL	-	-	**6**	**99.50**	**78**	-	**P15,187.00**

Expected stock after deliveries

Product	Bags	Heads / PCS	Kilos
OS1	4	48	68.00
PS4	2	30	31.50

Delivery verification

- [ ] All three delivery records are visible in Delivery History.
- [ ] The delivery total is P15,187.00.
- [ ] OS1 stock is 4 bags, 48 heads, and 68.00 kilos.
- [ ] PS4 stock is 2 bags, 30 heads, and 31.50 kilos.

2. Production Slicing

Production > Add Slicing

Batch A - OS1 to C10

Entry field	Encode	Expected calculation	Result
Bags	4	Standard slice	28 PCS/head
Heads	48	Standard PCS	1,344
Total kilos	68.00	Pack size	50 PCS
Actual sliced PCS	1,400	Full packs / loose	28 / 0
		Variance / yield	+56 / 104.17%

Batch B - PS4 to C10

Entry field	Encode	Expected calculation	Result
Bags	2	Standard slice	24 PCS/head
Heads	30	Standard PCS	720
Total kilos	31.50	Pack size	50 PCS
Actual sliced PCS	750	Full packs / loose	15 / 0
		Variance / yield	+30 / 104.17%

Expected C10 production: 2,150 PCS = 43 full packs + 0 loose PCS. OS1 and PS4 should both return to zero because all delivered stock was used.

Slicing verification

- [ ] Slicing History shows both line-level transactions.
- [ ] Combined heads = 78; bags = 6; kilos = 99.50.
- [ ] Combined standard PCS = 2,064; actual PCS = 2,150.
- [ ] Combined variance = +86; C10 current stock = 43 packs.

3. Customer Sales and Collections

Sales > All Sales (or Sell Chicken)

Receipt	Customer	Product	Quantity	Price/pack	Sale total	PCS out
009001	KAURAN	C10	10 packs	P395.00	P3,950.00	500
009002	ARENDON	C10	5 packs	P395.00	P1,975.00	250
TOTAL	-	-	**15 packs**	-	**P5,925.00**	**750**

Expected stock: C10 moves from 43 packs to 28 packs after the two customer sales: 2,150 - 750 = 1,400 PCS.

Record customer payments

Collections > Add Payment

Customer	Sale	Payment	Expected balance
KAURAN	P3,950.00	P2,000.00	P1,950.00
ARENDON	P1,975.00	P1,975.00	P0.00
TOTAL	**P5,925.00**	**P3,975.00**	**P1,950.00**

Sales and collection verification

- [ ] Sales History shows receipt 009001 under KAURAN only.
- [ ] Sales History shows receipt 009002 under ARENDON only.
- [ ] Collection Summary shows P5,925.00 sales and P3,975.00 paid.
- [ ] KAURAN balance is P1,950.00; ARENDON balance is zero.

4. Outlet Stock Transfer

Sales > Stock Transfers > New Delivery Order

Field	Value
Outlet	Use the same test outlet for the full scenario
Product	C10 - Bodega
Quantity	10 packs
PCS preview	500 PCS (10 x 50)
Remarks	TEST C10 OUTLET TRANSFER

Required transfer workflow

- [ ] Save and Dispatch the transfer from the web ERP.
- [ ] Open Incoming Transfers in the mobile app.
- [ ] Receive and confirm exactly 10 packs / 500 PCS.
- [ ] Verify that the transfer does not create sales revenue or customer balance.

Expected stock after confirmation

Location	Before transfer	Movement	Current
Bodega C10	28 packs / 1,400 PCS	OUT 10 packs / 500 PCS	18 packs / 900 PCS
Outlet C10	0	IN 10 packs / 500 PCS	10 packs / 500 PCS

Control: A manual outlet stock transfer is an inventory movement, not a sale. Gross sales and customer receivables must remain unchanged.

5. Mobile Cashier Sales

Menu prerequisite

Menu field	Required value
Menu name	Buttered Chicken
Selling price	P25.00
Mapped inventory product	C10
Deduction per sale	1 PCS

Before selling: Open a cashier shift. Use zero opening cash for the simplest reconciliation.

Transaction	Menu item	Quantity	Unit price	Cash total	C10 out
Mobile Sale 1	Buttered Chicken	3	P25.00	P75.00	3 PCS
Mobile Sale 2	Buttered Chicken	2	P25.00	P50.00	2 PCS
TOTAL	-	**5**	-	**P125.00**	**5 PCS**

Expected mobile and outlet result

Metric	Expected
Mobile transactions	2
Menu units sold	5
Cash sales	P125.00
Outlet C10 consumed	5 PCS
Outlet C10 current	495 PCS
Owner-friendly display	9 packs + 45 loose PCS
Expected cash at shift close	P125.00 (if opening cash and other cash movements are zero)

Mobile verification

- [ ] Today's Sales shows both transactions before and after shift close.
- [ ] Outlet inventory movement history shows two C10 stock-out entries.
- [ ] The shift reports two sales totaling P125.00.
- [ ] Outlet C10 stock equals 495 PCS.

6. Final Reconciliation

Bodega inventory

Product	Stock in	Stock out	Expected current
OS1	48 heads	48 heads to slicing	0
PS4	30 heads	30 heads to slicing	0
C10	2,150 PCS	750 sold + 500 transferred	900 PCS
C10 packs	43 packs	15 sold + 10 transferred	18 packs

Outlet inventory

Product	Stock in	Stock out	Expected current
C10	500 PCS	5 PCS through POS	495 PCS
C10 display	10 packs	5 loose PCS	9 packs + 45 PCS

Sales, collections, and reports

Measure	Expected amount
C10 customer sales	P5,925.00
Mobile Buttered Chicken cash sales	P125.00
Overall gross sales	P6,050.00
Customer collections received	P3,975.00
Outstanding customer receivables	P1,950.00
Stock transfer revenue	P0.00
Operating expenses	P0.00

Profitability: Cost of Sales, Gross Profit, Net Income, and the profitability ratio depend on the historical C10 cost stored by the ERP. Verify the formulas: Gross Profit = P6,050.00 - COGS; Net Income = Gross Profit - Operating Expenses. With no test expenses, Net Income should equal Gross Profit.

Final acceptance

- [ ] All expected inventory balances match exactly.
- [ ] Gross sales equals P6,050.00.
- [ ] Collections paid equals P3,975.00 and open balance equals P1,950.00.
- [ ] The transfer appears only as stock movement, not as revenue.
- [ ] No duplicate receipt, transfer, sale, payment, or inventory movement exists.
